I went to Canada to study English three months ago. I stayed there for two weeks. My host family took me to some famous places on weekends. From Monday to Friday I went to school, and I talked with the other students in English. I was happy when they could understand my English, and I often played basketball with them after lunch. I made a lot of friends.

One day, I went to a Japanese class. In class, the students were studying hard. They wanted to know about Japanese culture, so I taught them a Japanese song. It was difficult for them to sing a song in Japanese, but they practiced it with me. Soon they could sing it well. We had a very good time.

In the future I want to teach foreign people a lot of things about Japanese culture in English, so I'll study English harder. (3秒)
